

„PLISZKA” assembly machine for wooden flat items

SEMI-AUTOMATIC MACHINE

for shelves, pot plant stands and other similar flat wooden products

The machine allows to program the position of the staples in two rows. Workers manually move the tables with the elements arranged in the molds, activating the stapling cycle.

One employee can also work on one work table. The stapling program is carried out pneumatically, shot markers are placed on the molds, corresponding to a given product pattern. Very quick change of the product form. Capacity for two employees more than 1 200 units per shift.
