

## Wood Adhesive BIZON BM30-D3

Single-component wood adhesive based on polyvinyl acetate (PVAc) dispersion with D3 water resistance class. Designed for professional woodworking applications, in the furniture industry, and for joinery. It is used for gluing solid soft and hardwood as well as wood-like materials. Intended for use in cold presses and for manual gluing, as well as in hot presses for gluing veneers and laminates to chipboard and MDF panels.

- ✓ Water-resistant, D3 class (PN-EN 204 standard)
- ✓ Transparent bond
- ✓ Fast initial bond
- ✓ Good adhesion
- ✓ Durable connection of glued elements
- ✓ Aging resistant
- ✓ Wide range of applications
- ✓ Does not contain organic solvents
